MONTHLY FISHERIES

CATCH AND EFFORT STATISTICS

TASMANIA

1969–70

PREPARED BY COMMONWEALTH BUREAU OF CENSUS AND STATISTICS

RESTRICTED DISTRIBUTION ONLY

(Details contained in these tables are for information only. Under no circumstances should any of the information in these tables be published without the prior permission of the Fisheries Division of the Tasmanian Department of Agriculture.)

MONTHLY FISHERIES CATCH AND EFFORT STATISTICS

TASMANIA

1969-70

EXPLANATORY NOTES

The information shown in these tables is derived from monthly catch and effort returns submitted to the Fisheries Division of the Tasmanian Department of Agriculture and does not represent a complete coverage of all fishing activity in Tasmania. In particular, details of the abalone and scallop fisheries are collected separately and are excluded from these tables.

2. Details shown refer to fish and crustaceans landed in Tasmanian ports irrespective of the waters in which they were caught.

3. Catch is shown as actual weight landed whether 'in the round', 'gutted and gilled', 'gutted and headed', 'filleted', etc., only in Table 1 and in live weight equivalent in that and all other tables.

4. The following further details of catch are also available on request from the Fisheries Division of the Department of Agriculture:

- Catch by block by species and fishing method.
- Catch by port by species and fishing method.
- Catch by species by block and fishing method.
- Catch by species by port and fishing method.

CONTENTS

Table	Title	Page No.
1.	Monthly landings of fish, crustaceans and molluscs by species.	3 - 6
2.	Catch by species and fishing method.	7 - 18
3.	Catch by block and fishing method.	19 - 30
4.	Catch by port of landing and fishing method.	31 - 42
5.	Catch, effort, catch per unit effort and men and boats.	43 - 82
6.	Employment of men and boats by type of fishing method used.	83 - 86
7.	Employment of men and boats by type and number of fishing methods used.	87 - 90
